

Key Challenges of Technology and Corporate Governance

Question for thought:

As Singapore moves toward the modern era of digitisation, how can organisations leverage on information technology to have an edge over their competitors?

Digitalised technologies enable board members and company secretaries to keep under close review all legislative, regulatory and corporate governance developments that might affect the company's operations, and ensuring that the board is fully briefed on these and that it has regard to them when taking decisions.

This Breakfast Talk, jointly organised by CSIS and Diligent, aims to provide an insight on the state of the technology adoption in Singapore and to address the concerns of board members and company secretaries when adopting a new technology.

Date: Wednesday, 29th November 2017
Time: 0900 hrs - 1200 hrs
Venue: Rosewood Room, Level 1,
Swissotel Merchant Court,
20 Merchant Road, Singapore 058281
Registration: 17th to 27th November 2017

**Seats are limited,
first come first serve basis.**

To register

Speakers:

Mr Franklin Chen has over 7 years of experience in the SaaS industry, and as one of the key members of Diligent's Asia team, he has helped many organisations in the region to become more effective at the board level. By building key partnerships, and collaborating with a number of high profile public Asian companies, Franklin has been able to assist a number of organisations transition to electronic boards, helping them both improve security and corporate governance.

Mr Franklin Chen
Regional Sales Director, Diligent Corporation

Moderator:

Dr Tan Wee Liang is Associate Professor of Strategic Management at the Lee Kong Chian School of Business, Singapore Management University. He is currently the Chairman of CSIS Management Council.

Dr Tan Wee Liang FCS, FCIS,
Chairman, Chartered Secretaries Institute of Singapore (CSIS)
